About

MakeSPP is a student-run high-school hackathon and conference encouraging collaboration, entrepreneurship, and innovation. Hosted at St. Peter's Prep in Jersey City, MakeSPP brings together over 100 young engineers, designers, developers, and makers from across the tristate area to attend educational workshops and compete for prizes.

Why sponsor?

Last year, we brought together 110 innovative high schoolers and created a supportive environment consisting of workshops, mentors, and speakers. We provided for food, t-shirts, and even prizes during the event. However, without sponsors, MakeSPP would not be a reality. Through sponsoring our event, your company or organization will not only **contribute to our mission of empowering today's youth with the skills they need to make the world a better place**, but also receive **valuable brand exposure** and **feedback** for your products. Please feel free to view last year's Devpost (https:// makespp.devpost.com), where you can find the unique projects built by our participants last year. Our past sponsors include MongoDB, Balsamiq, Linode, and The U.S. Department of State.
